### Luxurious new Cosmetic Surgery Clinic opens in Bondi Junction

Published on Thu, 06/10/2011, 02:27:21

On the evening of September 28th, the press, key industry figures and a few celebrity faces were invited to the grand opening of Dr Mooney's (MBBS FRACS) luxurious new Bondi Junction Clinic for cosmetic procedures. At the launch guests celebrated with champagne and canapés and were shown around the beautiful new clinic by Dr Mooney and his skilled staff, who talked to guests about the cosmetic surgery and unique procedures that the clinic will be providing.

Dr Mooney at the clinic

A fully qualified and experienced Fellow of the Royal Australasian College of Surgeons (FRACS), Dr Mooney is a dedicated Ear, Nose, Throat, Facial Cosmetic and Head & Neck Oncology Surgeon, and highly regarded as a specialist in rhinoplasty surgery. "Nose surgery is not just about form, it's also about function," said Dr Mooney. "I take great pride in solving health issues...as much as creating a nose that's aesthetically appealing. Rhinoplasty is a complex procedure that aims to balance health and wellbeing with beauty."

Inside the clinic

Dr Mooney's surgical precision has resulted in the development of the Mooney Diamond Tip Technique, which has been independently assessed as achieving perfect functional and cosmetic outcome. "The tip of the nose represents the greatest challenge to surgeons," said Dr Mooney. "Achieving a good tip contour is the difference between an adequate and excellent nose. The Diamond Tip Technique allows us to create a more perfect shape and precise definition than ever before."

Dr Mooney with Professional Beauty's Jennie Lewis-Teal and Nina Richards

Dr Mooney's meticulous attention to detail extends beyond his respected surgical skills – in the ultra-modern surrounds of the Westfield Tower, colourful contemporary artworks of Bondi Beach are offset by chic all-white walls and highly polished black floors; Minimalist accents, such as oversized orchids, have been artfully placed to create a natural focal point, but the real feast for the eyes is the view – patients are treated to a panoramic view of Sydney's stunning skyline and harbour at its sparkling best.

"First-time patients tend to be nervous, so to help them feel at ease we have created a visual expression of what we stand for and the high-quality results you can expect at the clinic: we have a luxurious, state-of-the-art facility that balances the best that nature offers – the postcard-perfect harbour view – with the beauty that is created by man - the captivating pieces of art and sleek Barcelona leather chairs."

Dr Mooney with Deborah Hutton

Dr Mooney has a dedicated team of professionals who show exceptional patient commitment – each patient is closely guided through their chosen procedure from beginning to end, whether it be surgical (rhinoplasty, blepharoplasty, face lifts, thread lifting and otoplasty) or non-surgical treatments (BOTOX, Juvederm and Aquamid).

Each patient meets with Dr Mooney several times before undergoing surgery and, thanks to the clinic's high-tech computer imaging technology, is able to see projected images of how their new nasal contour will appear. "Imaging software is an indispensable tool; patients are amazed to see the difference the projected nose surgery can make to their overall appearance," added Dr Mooney.
