

Stylish New Medispa

Combining specialist procedures with the ultimate in luxury, Medispa makes facial rejuvenation a whole new experience.

The new bench mark in anti-ageing beauty treatment, the boutique luxury 'Face Plus Medispa', has opened its doors in the heart of Sydney's Eastern Suburbs. Operated by leading facial cosmetic surgeon, Dr William Mooney, the new clinic concentrates on medical grade laser treatments, cosmetic treatments and innovative skincare. Set above the buzz of Bondi Junction, and with sky-high views of Sydney Harbour, the Medispa has been designed to create a non-clinical environment with artworks and classic modernist furniture. The treatments are designed to enhance natural beauty, repairing damage from the inside out and acting as a break pad against future ageing – all within this luxury escape for the senses. Featured amongst their range is the new Titan Laser, also known as the 'no downtime face lift'. It's a favourite of Hollywood stars as famed as Madonna and Sharon Stone. "We pride ourselves on our in-depth analysis of a client's needs, wants, concerns and facial aesthetic," Dr Mooney said. ●
